Douglas J. Austin, M.D.

IVF Charges

To help you plan your finances, we have elected to charge a global fee for IVF. This is a set cost, representative of a typical IVF cycle, and includes:

- Visits associated with the IVF cycle
- Ultrasounds
- Hormonal monitoring
- Embryo development, care, and transfer
- ICSI

Items that are not included are medications, laboratory tests, semen analysis, and other services needed prior to the start of stimulation, which typically are an additional \$3,000 to \$5,000. Medication costs are generally about \$1,500 and are not provided by our center.

FINANCIAL TERMS: Before beginning a cycle, we require that a financial plan is in place. For your convenience, we accept check, cash, VISA, American Express, MasterCard, and Discover. Our Financial Coordinator, Rebecca, will meet with you to discuss the terms of the agreement.
